

Fabrizio Bertoglio

Full-Stack Software Engineer (React, Node.js)

Github: <https://github.com/fabOnReact>

Email: iloveprogrammingapps@gmail.com

PROFILE

I am a Full-Stack Software Engineer with over 10 years of experience in full-stack development, specializing in React, JavaScript, TypeScript and Node.js.

EXPERIENCE

Discord - Software Engineer (contractor), March 2025 - July 2025

Expensify - Software Engineer (contractor), March 2023 - February 2025

- I improved the Android and iOS React Native implementation of the Text and TextInput components.
- I successfully merged all [pull requests](#) into the upstream facebook/react-native repository.

I have a [reference](#) on LinkedIn from Daniel Gale-Rosen.

Meta - Software Engineer (contractor), January 2022 - March 2023

I collaborated with the Meta Accessibility Team in New York to improve react-native [Accessibility APIs](#):

- I added Accessibility APIs to Text, TextInput, ScrollView, FlatList, Modal and Nested Text components.
- I gained a deep understanding of the internal implementation of React Native.
- I published high-quality pull requests to add features and resolve issues in the facebook/react-native repository.

Meta - OpenSource contributor, March 2020 - January 2022

I worked part-time on [facebook/react-native](#) with the support of community donations:

- I resolved high-profile issues in the facebook/react-native repository ([#17530](#), [#29070](#), [#29117](#), [#29099](#), [#29046](#)).
- I contributed to the project with 59 [pull requests](#) and 30 [commits](#).

I have a [reference](#) on LinkedIn from Eli White.

Comm - Software Engineer (contractor), July 2021 - September 2021

Worked on the Comm end-to-end encrypted messaging [application](#) built with React Native.

Urbi - Frontend Engineer (contractor), 2020 - 2021

Worked on a mobility [app](#) for rental of electric vehicles.

- Implemented iOS and Android features using React Native, Typescript, Redux, Redux-Saga.
- Fixed issues in the native implementation of react-native-maps and react-native-navigation.
- Wrote end-to-end and integration tests with jest, react-native-testing-library and Detox.

I have a [reference](#) on LinkedIn from Michele Bonazza.

Upwork - Full-Stack Software Engineer, 2019

As a top-rated freelancer on Upwork, I completed several freelance projects, including:

- Developing an encrypted file-sharing messaging application using React Native.
- Building an e-commerce platform with Ruby on Rails, similar to Shopify.
- Creating a CLI utility to monitor price fluctuations on Betfair.
- Developing a Ruby library to track cryptocurrency price fluctuations using the Binance API.

ProSiebenSat.1 - Full-Stack Software Engineer (contractor), 2018

I worked on the [SportDeutschland](#) and [YouSport](#) multi-tenancy video-streaming platforms.

- I implemented frontend functionalities with Angular.js for the SportDeutschland video streaming platform.
- I developed Video APIs for uploading videos, managing CDNs and metadata using Ruby on Rails and MongoDB.

I have a [reference letter](#) from Andreas Überbacher.

Professional Development - Career Break, 2016 - 2017

- In 2016, I completed the Goethe [B1](#) and [B2](#) German Examinations in Dresden as a private student.
- In 2017, I published five applications written in Ruby on Rails and React. I showcased these applications on my [GitHub profile](#), at [React Native EU 2020](#), and on my [YouTube account](#).

Accenture, Software Engineer (contractor), 2015 - 2016

I implemented, developed, and tested Custom ERP software solutions for Fiat Chrysler Automotive.

My responsibilities included implementing custom functionalities for registering invoices and purchase orders.

Ohana Discretionary Trust, Junior Software Engineer (contractor), 2014

I worked in Sydney as a Junior Software Engineer.

I have a [work certificate](#) for my professional experience in Australia and an [IELTS Academic 7.0](#) certificate.

Capgemini, Junior Software Engineer, 2012 - 2013

I developed custom ERP software solutions for Fiat Chrysler Automotive:

- Implemented custom accounting functionalities, including promise to pay, write-offs, registering of receivable, payables or general ledger transactions.
- Troubleshooted and fixed issues in custom accounting functionalities (reviewing code and debugging).
- Wrote specifications documents for custom accounting functionalities.
- Conducted end-to-end tests and user acceptance tests.
- Conducted training of end-users in Germany and prepared documentation for end-users.

I have LinkedIn [references](#) from Kiran Singh Deopa and Sushil Hadge.

Accounting Sas, Accountant, 2011

Internship as Accountant. I have a [reference](#) from Chartered Public Accountant Cataldo Caputo.

EDUCATION

Master in Business Administration, University of Turin (Italy), 2009-2012, 100/110

Bachelor in Business Administration, University of Turin (Italy), 2007-2009, 101/110

SKILLS

Javascript, TypeScript, React Native, React, Jest, Ruby, Java, PostgreSQL, MongoDB.

LANGUAGE SKILLS

German [B2](#), [B1](#) Goethe Certificates and an [IELTS Academic 7.0](#) certificate in English.
